Re: Letter of Support – Bay of Islands Radio Inc (BayFM)

To who it may concern,

It is my pleasure to write a letter in support of Bay of Islands Radio Inc's application to the Canadian Radio-Television and Telecommunications Commission to move their transmitter site to a new location to significantly increase the stations power and reach.

BayFM is the only local radio station in Corner Brook and many people in our community rely on them for local news, weather, sports, and other specialty programming and updates. It is important that they move the transmitter site, to provide better reach for our community and strengthen their signal to financially support the stations operations through advertising.

BayFM broadcasts live local content a minimum of 12 hours each weekday. This is important to our community and the City of Corner Brook Council fully supports them as they apply to move their transmitter site in an effort to increase their power and reach as well as improve the financial stability of their operations.

Yours very truly,

Jim Parsons
Mayor
