

## **PhoneTech** **Voice/Data & Security**

---

To Whom it May concern:

I am writing this letter in support of Bay of Islands Radio Inc (BayFM) to move their transmitter site to a new location to increase the station's power and reach.

BayFM radio is the only local radio station we have left in Western NL and their focus is 100% on the community and its people. Over the past few years I have seen this station grow and recently brought on new staff with a new office location. We as a community rely on this service for such things as Weather and news updates, school updates, fundraising events, and practically anything happening around town that people can get information on. Yes, social media is out there; however, not everyone relies on it and the radio is a much more personal touch, especially when the announcer is local and knows his/her community.

As a business owner, resident, and volunteer myself see the need for this station and the stronger signal reach and I fully support them in every way I can. Having a stronger signal will ensure BayFM can survive and grow in the future.

Thank you,

Steve Churchill
