

**HOUSE OF ASSEMBLY**  
NEWFOUNDLAND AND LABRADOR

Bay of Islands Radio Inc  
Corner Brook, NL

August 15, 2023

To whom it may concern:

I am writing to express my support for the application to the CRTC to move the transmitter for Bay of Islands Radio Inc (Bay FM) to a new location so they can increase the station's power and reach significantly.

Bay FM provides a much needed service to the Bay of Islands area and is an essential part of a vibrant community. The station has grown significantly over the years and now is the only remaining local radio station in the Corner Brook area. It provides local news, weather, sports and other specialty programming.

The change they are applying for would increase power levels and result in better reception and significantly increase the reach of the station. This is important given the service they provide and would also enhance their viability in relation to sponsorship and advertising.

In conclusion, I encourage you to approve this application so the people of this area can receive enhanced access to Bay FM.

Sincerely

Scott Reid  
Member of the House of Assembly
