TO WHOM IT MAY CONCERN

**Re: Letter of Support for BayFM**

We are a small rural community of approximately 500 people located on the west coast of Newfoundland. As with most rural communities these days, we are underserved with all kinds of services, one of which is a local radio station.

We are therefore thrilled that Bay of Islands Radio (BayFM) is looking to relocate their transmitter and increase the station's power, and wholeheartedly support their efforts.

BayFM is the only local radio station that serves this area. It provides local news, weather, sports and other specialty programming specific to our location, and is therefore far more relevant than the one other station we are able to pick up. They are building relationships with their local communities and are very aware of the issues that face us day in and day out.

As you may or may not be aware, we are seeing increasingly destructive weather events here in Newfoundland, and in the event of an emergency a local radio station is going to be invaluable if we have to communicate with residents. Without BayFM, this is not available to us, so we hope that you will approve their application and allow these upgrades to go ahead.

Sincerely

*N. Parks.*
